

## Chemicals Available at Kam High (as of June 2004)

**Notes:** "CODE" refers to the storage code for each chemical:

G = GREY = general storage

B = BLUE = toxic

Y = YELLOW = oxidizing agents and reactive substances

R = RED = flammable or highly reactive with water

W = special storage (for example acids)

CG = compressed gases

Ind = keep on Indicators shelf (assumed to be part of GREY storage)

**"DISP"** refers to Flinn Scientific disposal codes (see below). Each school is required to have and keep the Flinn Scientific catalog to be able to reference the safety materials & disposal information.

NOTE: "vent, 26a" means "vent the gas in a fume hood"

The disposal methods are listed at the end of the main table. Consult the Flinn Scientific catalog for details (All secondary schools are required to have one.)

Chemical	Formula	Code	Disp
Acacia	(complex)	G	26a
Acetic acid	CH <sub>3</sub> COOH	W	24a
